*Units measured in cubic feet per minute (CFM)

When judging between independent room air cleaning systems and whole-home system like AccuClean which is installed as part of your central heating and air conditioning system, it's important to remember that AccuClean is more efficient and less intrusive on your home's environment than portable room air cleaners.

In fact, if you added one ionic type appliance to every room in your home, they would not significantly affect the air like a AccuClean whole-home system can. Plus at \$300 to \$500 each, AccuClean is simply a better economical choice, now and for years to come. AccuClean is your whole home clean air solution.
